

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1. (Currently amended) A combined printing and binding device comprising:  
a media tray adapted to receive and retain a plurality of media sheets;  
a first plurality of page-width printheads adapted arranged to print ink onto a opposing sides of at least one of said media sheets;  
an adhesive applicator adapted to apply adhesive to a media sheet;  
a binder adapted to bind a plurality of media sheets together; and  
a housing adapted to house the media tray, the printhead, the adhesive applicator and the binder;  
wherein the device is adapted to print and bind a media sheet positioned in an original plane of orientation in the media tray by transporting ~~the~~ a first said media sheet from the media tray, past the printhead and the adhesive applicator, to the binder, whilst substantially maintaining the media sheet in its original plane of orientation.
2. (Original) The device of claim 1, adapted to transport the media hsheet from the media tray, past the printhead and the adhesive applicator, to the binder in a substantially straight line.
3. (Original) The device of claim 1, wherein the media tray and the binder are arranged end-to-end with the printhead and adhesive applicator positioned intermediate the media tray and the binder.
4. (Original) The device of claim 3 wherein the wherein the media tray and the binder are arranged in a portrait orientation.
5. (Original) The device of claim 4 wherein the media sheet has a long edge and a short edge and wherein the length of the housing is less than three times the length of the long edge of the media sheet.

6. (Original) The device of claim 3 wherein the media tray and the binder are arranged in a landscape orientation.
7. (Original) The device of claim 6 wherein the media sheet has a long edge and a short edge and wherein the length of the housing is less than three times the length of the short edge of the media sheet.
8. (Currently amended) The device of claim 1, wherein at least two of said~~further comprising a second page-width printheads are positioned opposite to each other to enable the first page-width printhead, the first and second page-width printheads being adapted to simultaneously printing of ink onto both opposing~~ sides of the media sheet as the media sheet passes between the ~~two~~ printheads.
9. (Original) The device of claim 8 adapted to print colour images onto media sheets at a rate of over 30 double sided sheets per minute.
10. (Original) The device of claim 1, adapted to be wall-mountable.
